TEQUILA

Tequila is a distinctive Mexican distillate, made from the blue agave, which offers a rich variety of profiles depending on its ageing:

White | *Fresh and vibrant, with herbal, citrus notes and pure agave flavour.*

Reposado | *Smooth and harmonious, with hints of vanilla, caramel and a slight smokiness, thanks to its ageing in barrels.*

Añejo | *Complex and refined, with layers of cocoa flavours, spices, nuts and a touch of wood.*

Each tequila is a unique expression of tradition and flavour.

MEZCALES

Mezcal is a unique distillate from México, produced from several varieties of agave.

Its flavour is intense and deeply smoky, with a complexity that varies according to the type of agave and the production process. Mezcal is a drink that encapsulates history, tradition and a unique sensory richness.

SOTOL Y CRISTALINO

Sotol is a Mexican distillate made from the Dasylirion plant, which grows mainly in northern México. Its flavour is distinctive, with herbal, floral and mineral notes, accompanied by a subtle smoky nuance that makes it unique.

Cristalino is a tequila or mezcal that has been filtered to remove impurities and give it a crystalline appearance, maintaining the characteristic notes of the agave with exceptional smoothness. Its flavour is smoother and more elegant, with hints of cooked agave, vanilla and subtle sweet notes, but without losing the authenticity of the original distillate.
